📁 PROJECTS

Travel Form Website

Embark on my web development journey with the Travel Form Website. Designed for seamless travel planning, users can express their journey interest through forms. Developed using HTML, CSS, Bootstrap, PHP, and MySQL.

Status: Not Hosted

Live Match Data Website

Experience a dynamic UI with our website crafted using jQuery and Tailwind CSS. Enjoy real-time updates on matches without refreshing the entire page. The sleek design ensures an engaging experience while keeping you informed with live match data.

Status: Not hosted

Fire Clash Enterprises Internship

During my internship at Fire Clash Enterprises, I successfully developed 21 websites over a three-month period.

Below are three representative links:

Website 1 [🔗](#)

Website 2 [🔗](#)

Website 3 [🔗](#)

You can explore all websites here [🔗](#)

These websites showcase my proficiency in Bootstrap, HTML, CSS, and JavaScript, with dynamic PHP-driven header and footer repetition.

Status: Hosted

Let's Run (Shoes shop) [↗](#)

Discover the perfect pair at our Shoes Shop website. Crafted with Bootstrap, HTML, CSS, and a hint of JavaScript, it offers a stylish and user-friendly platform to explore and purchase footwear.

Status: Hosted

React Todo List with Dark Mode [↗](#)

Explore the productivity of my Todo List app built with React, featuring local storage for seamless data persistence. The UI is enhanced with Bootstrap, offering a sleek design with the added convenience of Dark Mode.

Status: Hosted

React Fitness Tracking App [↗](#)

Boost your workouts with my Fitness Tracking App made using React. The app offers a sleek design with Material-UI, making it easy to navigate. You can track your workouts, set goals, and visualize your progress.

Tech Used: React, Material-UI, React Router Dom

Skills Showcased: Design, React Development, Routing

Status: Hosted

Travel Website (Front End) [↗](#)

Embark on a visual journey with my React-based Travel Website. The captivating front end, crafted with React JSX and styled with SCSS, offers a dynamic and immersive experience. Enhanced with AOS for smooth animations, explore destinations and plan your journeys seamlessly.

Status: Hosted

Gym Website [↗](#)

Revamp your fitness routine with my easy-to-use Gym Website created using React. With React Router Dom and MUI, navigating the site is a breeze. It incorporates Rapid API to display GIF animations for exercises and their targeted body parts. Plus, find helpful workout guidance through embedded YouTube videos.

Status: Hosted

Movix Web Application [↗](#)

Dive into movies with my Movix website, crafted using React. It connects with the TMDB API to display movie details, ratings, categories, and trailers. The site utilizes React Router Dom for seamless navigation, incorporates unlimited scroll for easy browsing, and features lazy loading and loading skeletons for a smooth experience. State management is handled efficiently with Redux.
